Your diploma online!

Check mijndiplomas.nl

Passed your exams? You can view your diploma data online in Mijn diploma's. You can also download an authenticated digital copy of your diploma data in Mijn diploma's. This is free of charge.

View your diploma data

You can view your diploma data by logging into Mijn DUO. You will need a DigiD to do this. Once you have logged in, you can download an authenticated file containing your diploma data. This is an official document and is valid proof of your results. It includes a certificate of authenticity which proves that it is original and has been issued by DUO. Only use this file in its digital form. When printed it will lose validity.

Are you planning to continue studying?

Educational institutions can view the data in Mijn diploma's. This enables them to determine whether you have completed the required education for your new programme. If the institution requires further proof of completion, you can email them an authenticated copy from Mijn diploma's.

Are you planning to look for employment?

You can easily add an authenticated file from Mijn diploma's to your Europass portfolio. With your Europass profile, it's easy to make a Europass CV. For more information, please go to [Europass.eu](https://europass.eu)
